

## Solution Architect (M/F/D)

### About Spherity

We're a team of ambitious, forward thinking individuals with an entrepreneurial and technological mindset to build decentralized identity management solutions that power the 4th industrial revolution, by bringing digital identities to machines, algorithms, enterprises and other non-human entities.

We bring together the mission of rebooting the web of trust, making identities self-sovereign and bring the world the benefits of decentralized solutions.

Our passion and hard work makes Spherity a market leading provider of data integrity requirements of the Industrial Internet of Things (IIoT) market. Our client focus is primarily on technical industries, in particular pharmaceuticals, mobility and logistics.

---

### Responsibilities

- You will work on digital identity and Industry 4.0 projects as part of an open-minded, competent and multicultural team
  - You will analyse technical customer requirements for improvements of our products
  - You will work closely with our customers and advise on application and interface-related topics
  - You will drive architecture concepts that enable decentralized identity technology for our customers in Europe and internationally
  - You will participate in international projects
  - You need to ensure smooth transition of projects into operations
  - You will monitor application performance and data quality
  - Your architecture planning will consider security, performance, uptime, disaster recovery and capacity growth
  - Our products will show a footprint of your work and ideas
- 

### Professional skills and experience

#### Minimum qualifications

- Bachelor's degree, preferably master's, with demonstrated academic excellence, ideally in business or computer science
- 2-5 years as consultant, project management; or as part in a SaaS start-up or digital champion
- Deep understanding of architecture and all aspects of the software development life cycle
- You have strong knowledge of interfacing and integration technologies to connect cloud and on-premise solutions
- Good understanding of general database concepts and technology
- Experience in project management

#### Optional

- Experience with digital identity concepts, cloud, Blockchain, APIs, and PKI infrastructure
- Background in automotive, pharma, transportation, logistics or production industry
- Experience in working in an agile work environment

---

## Your soft skills

- Good communication skills
- Flexible and resilient
- Ability to work independently and disciplined
- Team-player and problem-solver
- You're fascinated with new technology and see all its possibilities
- You're an early adopter and are constantly keeping an eye out for the next big thing
- You're open-minded and excited by turning bright ideas into brighter solutions
- You're eager to help others understand the potential of digital and apply it to their business
- Big interest and curiosity in strategic, digital transformation topics of identity
- Self-motivated drive to achieve the best solution for clients
- Proficient and clear communication in English and German

---
